

# Ultimate Texas Hold'em Progressive

Ultimate Texas Hold'em Progressive features heads-up play against the Dealer, and optional Trips bonus bet and a progressive bet! This game gives you several advantages including:

- The earlier you bet, the more you can bet
- You don't have to fold until you see all the Community Cards
- The Trips Bonus pays odds if your final 5-Card Hand is a Three-of-a-Kind or better. A player may fold, forfeiting their Ante and Blind Wagers, and still win the Trips Bonus wagers if they have a hand listed on the posted pay table.

## The Bet

Players begin by making equal bets in the Ante and Blind circles, and they have the option to place a bet in the optional Trips and Progressive bets. (Progressive Bets are explained further down)

### Blind Bet

Royal Flush  
Straight Flush  
Poker  
Full House  
Flush  
Straight

### Payout

500:1  
50:1  
10:1  
3:1  
3:2  
1:1

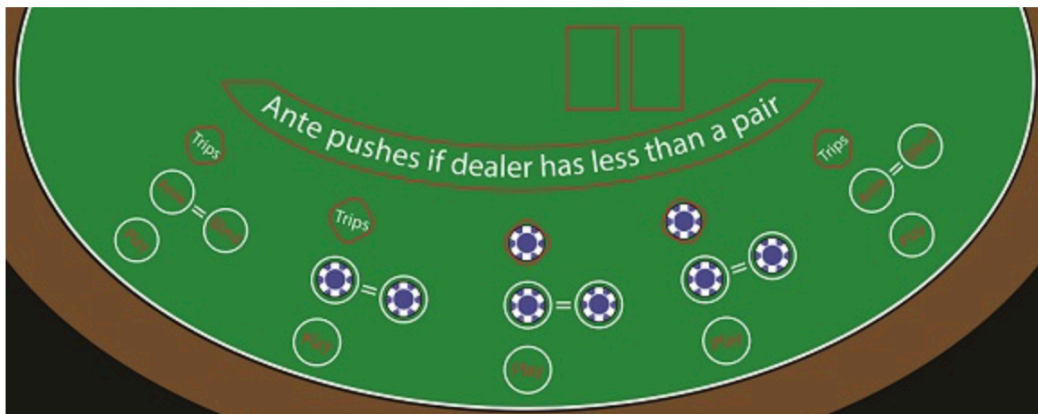

### Trips Bet

Royal Flush  
Straight Flush  
Poker  
Full House  
Flush  
Straight  
Three of a Kind

### Payout

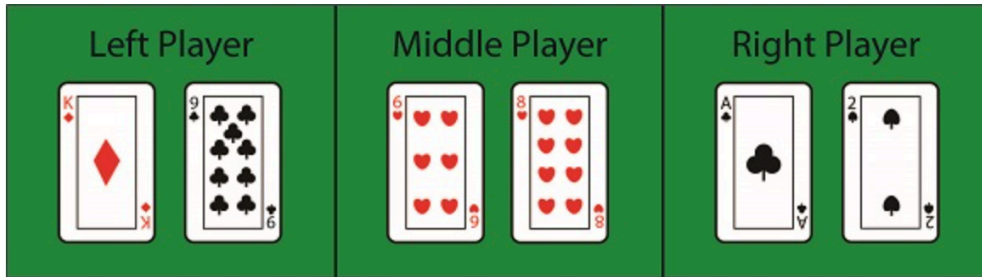

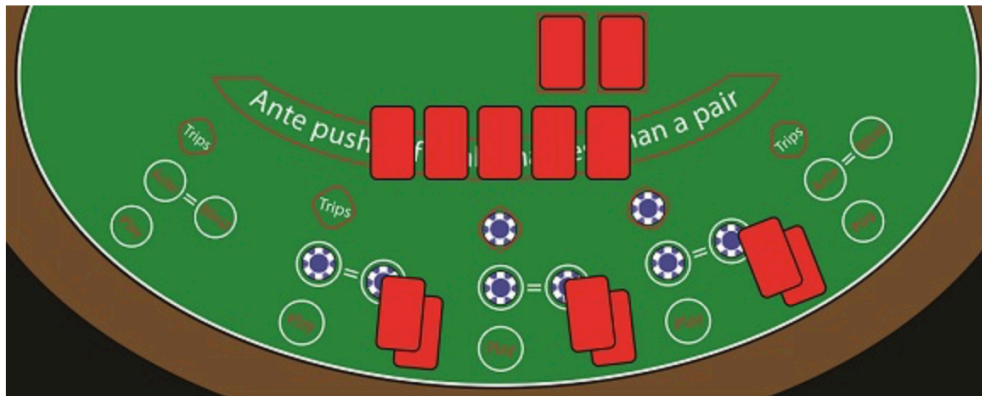

50:1  
40:1  
30:1  
8:1  
7:1  
4:1  
3:1

In the image below, all the Players chose to make equal Ante and Blind bets and the optional Trips bet.

### The Play

After placing their bets, all Players will receive two face-down "Hole Cards". The Dealer will also deal 5 face-down "Community Cards" and 2 face-down cards to himself.

Once the Dealer has dealt all the cards, Players will look at their Hole Cards and decide whether they want to check or bet 3x - 4x the Ante.

#### Play Bet

Before the Flop

After the Flop

On the River

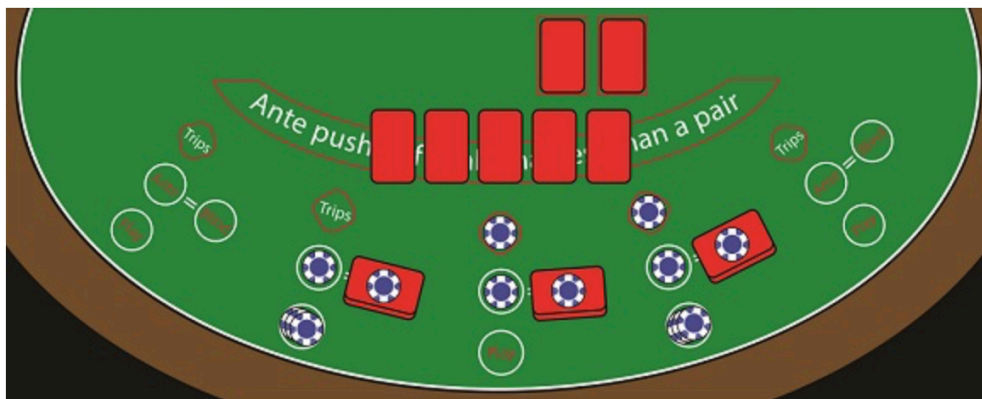

#### Payout

3x - 4x

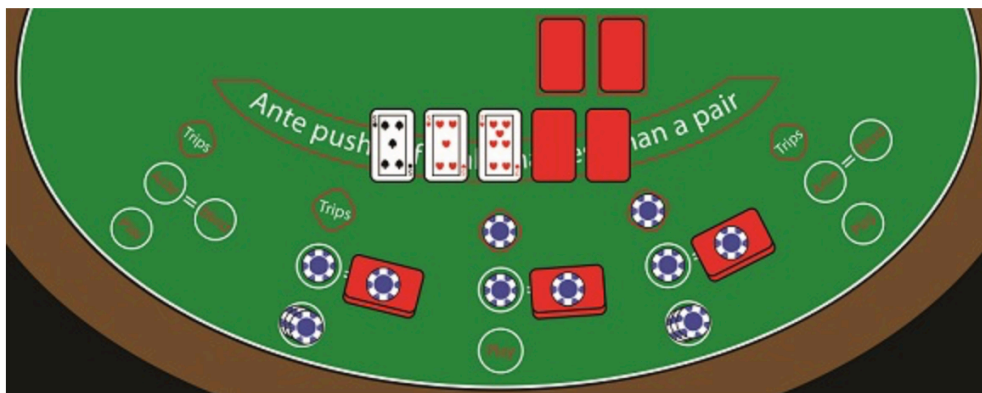

2x

1x

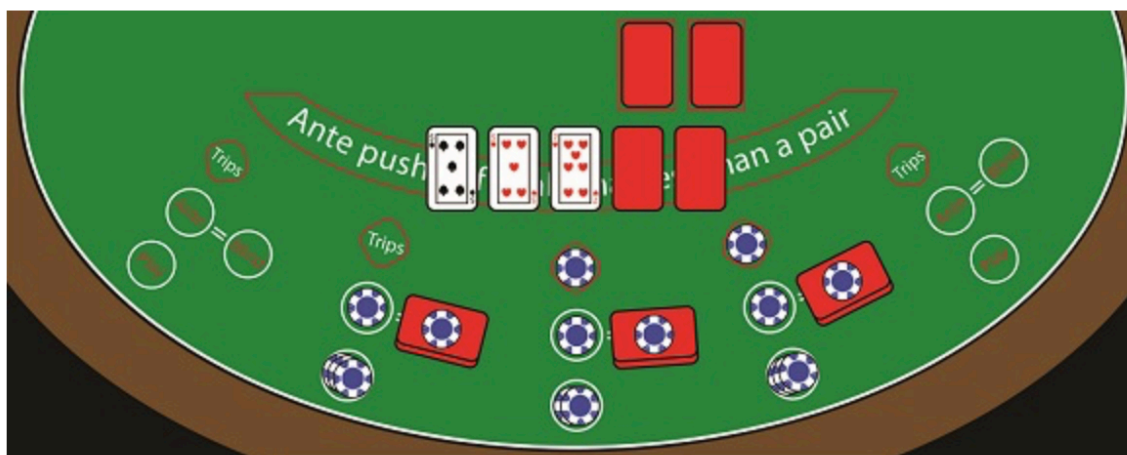

In the image below, the Left and Right Players chose to make a 3x Play bet, which they place on their "Place" circles, and then they place their Hole Cards underneath their Blind bet. The Middle Player chose to check.

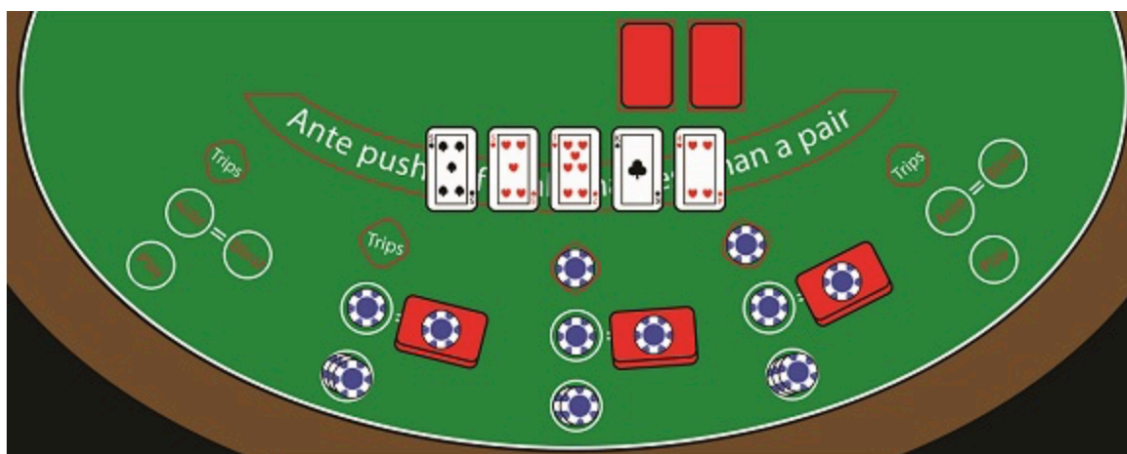

The Dealer then reveals the the first 3 Community Cards, which is called the 3-Card Flop.

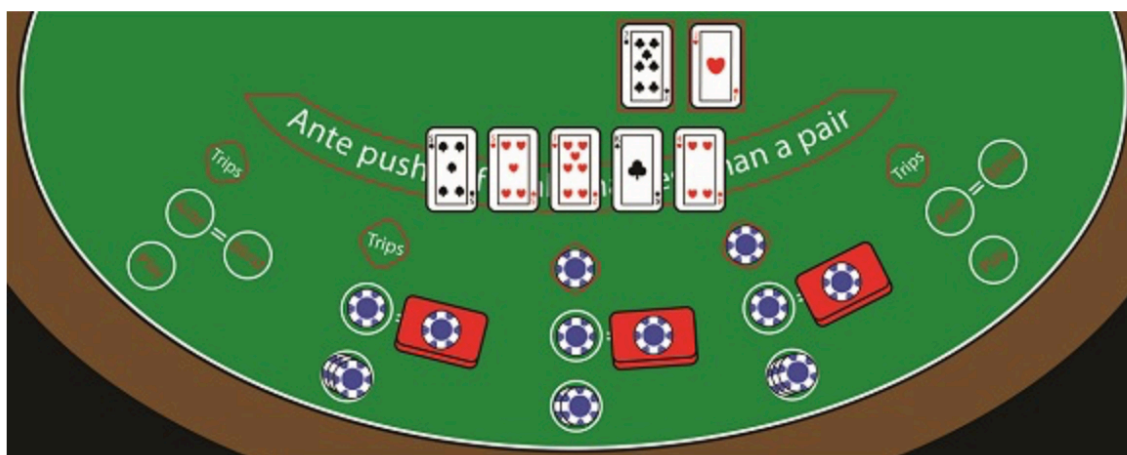

After the Dealer reveals the 3-Card Flop, Players who have not already placed a Play Bet can either check or place a Play Bet that is 2x their Ante Bet. In the Image below, the Middle Player chose to place a 2x Play Bet.

Once all the Players have checked or placed their Play Bets, the Dealer reveals that final two Community Cards. Players who have not already placed a Play Bet can either check or place a Play Bet that is 1x their Ante Bet. In the Image below, all the Players already placed Play Bets, so they all check.

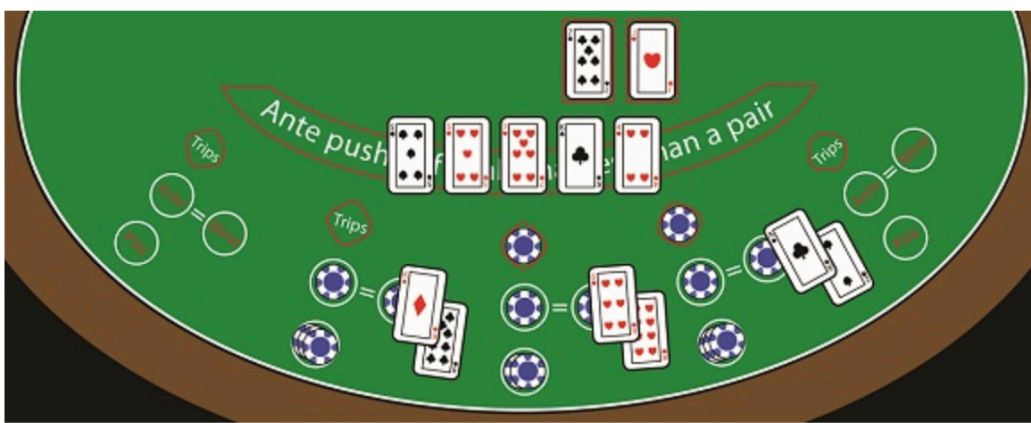

Once all the Players have checked or placed their Play Bets, The Dealer reveals his two Hole Cards and announces his hand. In the Image below, the Dealer has a 7 of Clubs and a Jack of Hearts.

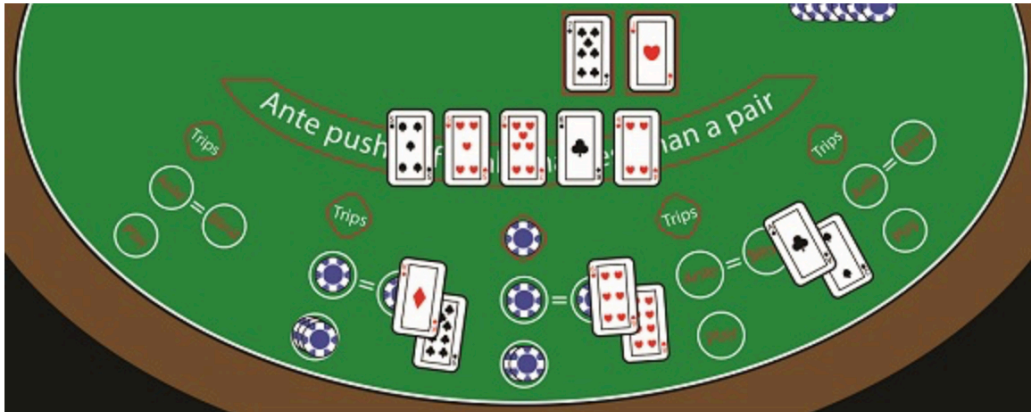

If the Player's Hand beats the Dealer's Hand, the Player receives a 1-to-1 payout on his Ante and Play bets. The Blind pays if the Player's winning hand is at least a Straight and pushes if it is less than a Straight. If the Dealer's Hand beats the Player's Hand, the Player loses his Ante, Blind, and Play wagers. If the Dealer and Player tie, the Player's Ante, Blind, and Play wagers push.

The Dealer needs at least a Pair to qualify. When the Dealer doesn't qualify, he returns the Player's Ante, but all other bets receive action.

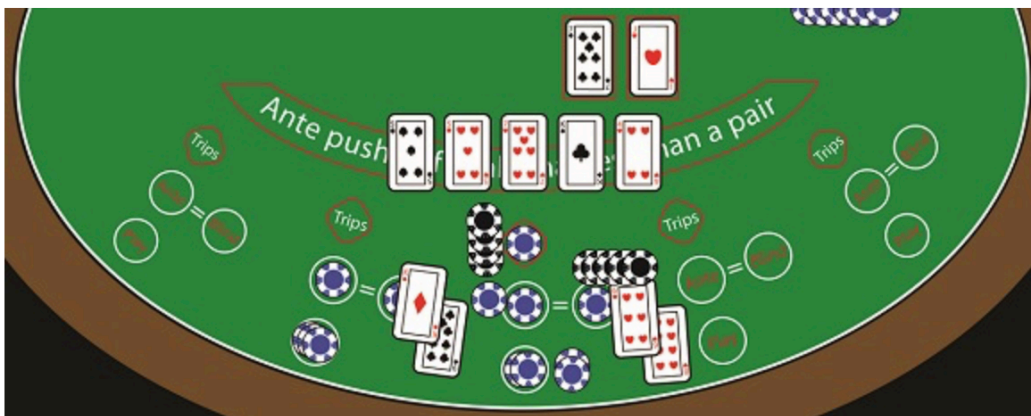

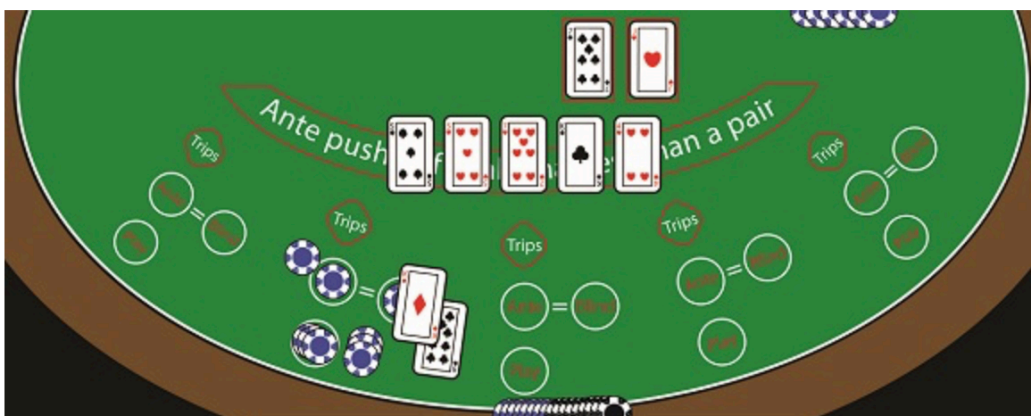

The Right Player's best cards are the Pair of 5s in the Community Cards, while the Dealer has a Pair of 7s so the Dealer wins. The Right Player loses his Ante, Blind, Play, and Trips wagers.

The Middle Player has a Straight Flush, while the Dealer has a Pair of 7s so the Middle Player wins. He wins a 1-to-1 payout on his Ante and Play Bets, 50-to-1 on his Blind Bet, and 40-to-1 on his Trips Bet.

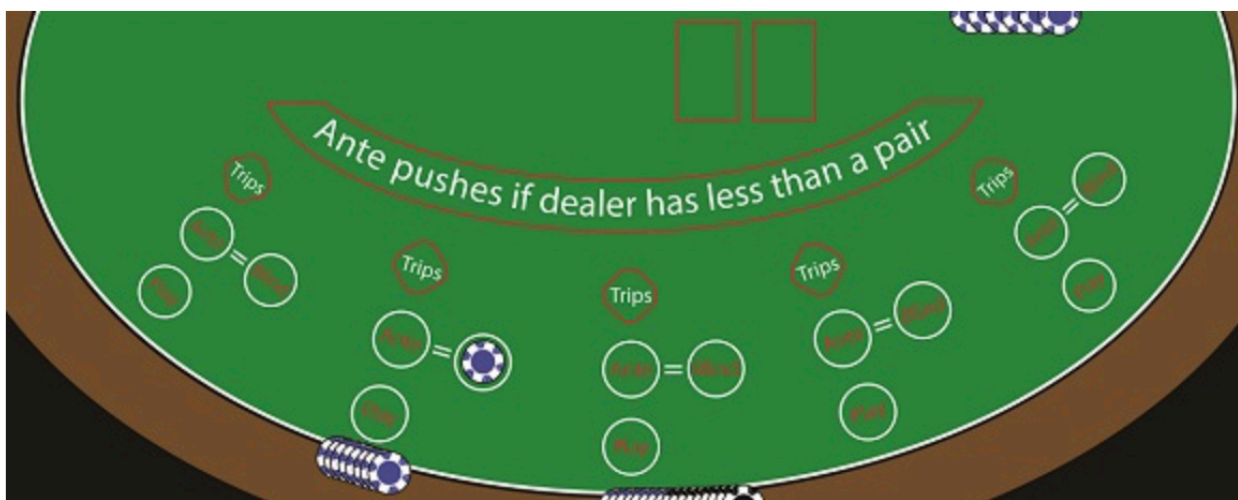

The Left Player has a Pair of Kings, while the Dealer has a Pair of 7s so the Left Player wins. He wins a 1-to-1 payout on his Ante and Play Bets. Because he won against the Dealer with less than a Straight, his Blind Bet pushes.

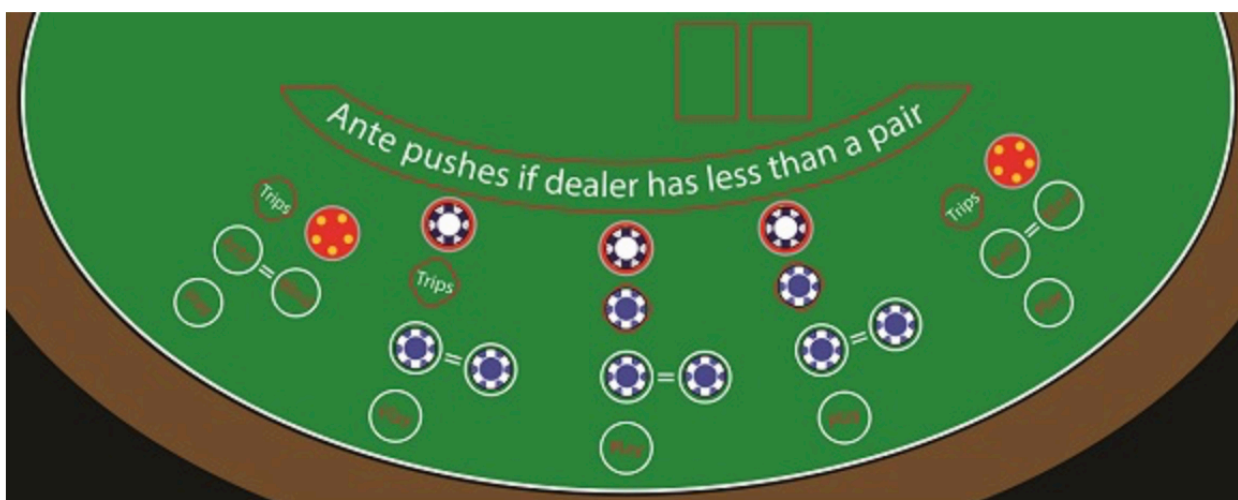

Once all the payouts have been paid, the Dealer collects all the remaining cards.

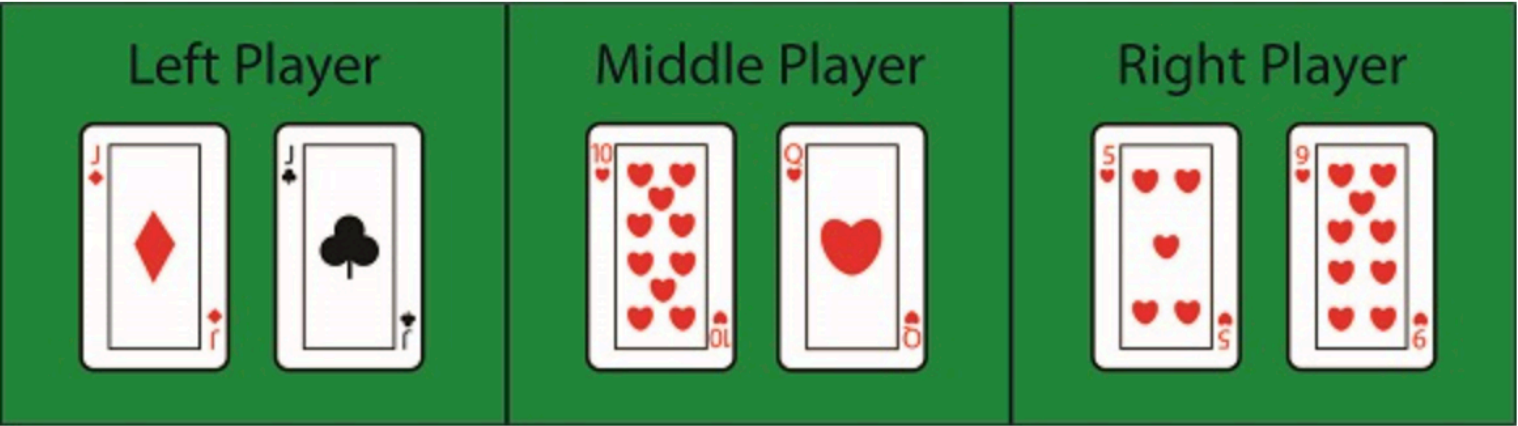

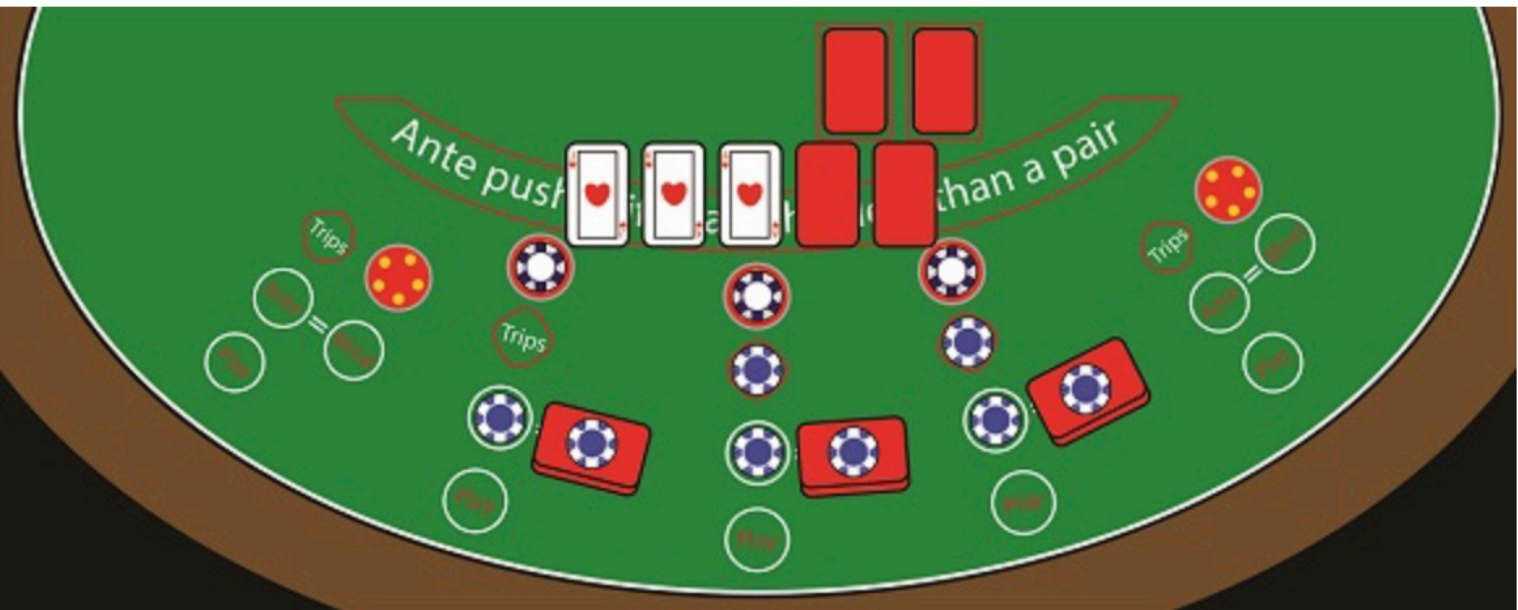

### Progressive Payouts

For a Progressive Bet, the Player can bet on their Hand and/or the Dealer's Hand. In the image below, all 3 Players placed a \$1 Progressive Bet on the red light-up space. The Middle and Right Players also placed \$10 bets on the Ante, Blind, and Trips spaces, and the Left Player placed \$10 bets on the Ante and Blind spaces.

Progressive winners are determined from the Player's 2 Hole Cards and the first 3 Community Cards (the Flop). The Dealer's Hand is the Dealer's 2 Hole Cards with the first 3 Flop Cards.

In the Image below, the 3 Flop Cards are a Jack of Hearts, a King of Hearts, and an Ace of Hearts.

The optional Progressive Bet wins if the Player has a Straight or better.

**Progressive Bet**

- Royal Flush
- Straight Flush
- Four-of-a-Kind
- Full House
- Flush
- Straight

**Payout**

- 100% of the Jackpot
- 10% of the Jackpot
- \$300
- \$50
- \$40
- \$30

In the above example, the Left Player only has a Three-of-a-Kind and loses the Progressive Bet. The Middle Player has a Royal Flush, so they win 100% of the Jackpot, which is individually listed at each Ultimate Texas Hold'em Table. The Right Player has a Flush, so they win \$40 from the Progressive Bet.
